Target Sound Recognition Service

Ears of your own devices

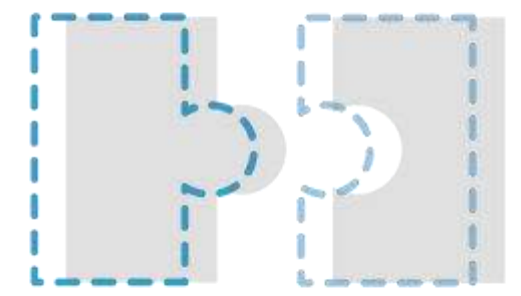

High Accuracy

Advanced audio preprocessing patent combined with unique recognition algorithms allow our AI to achieve higher accuracy and lower false alarm on our system.

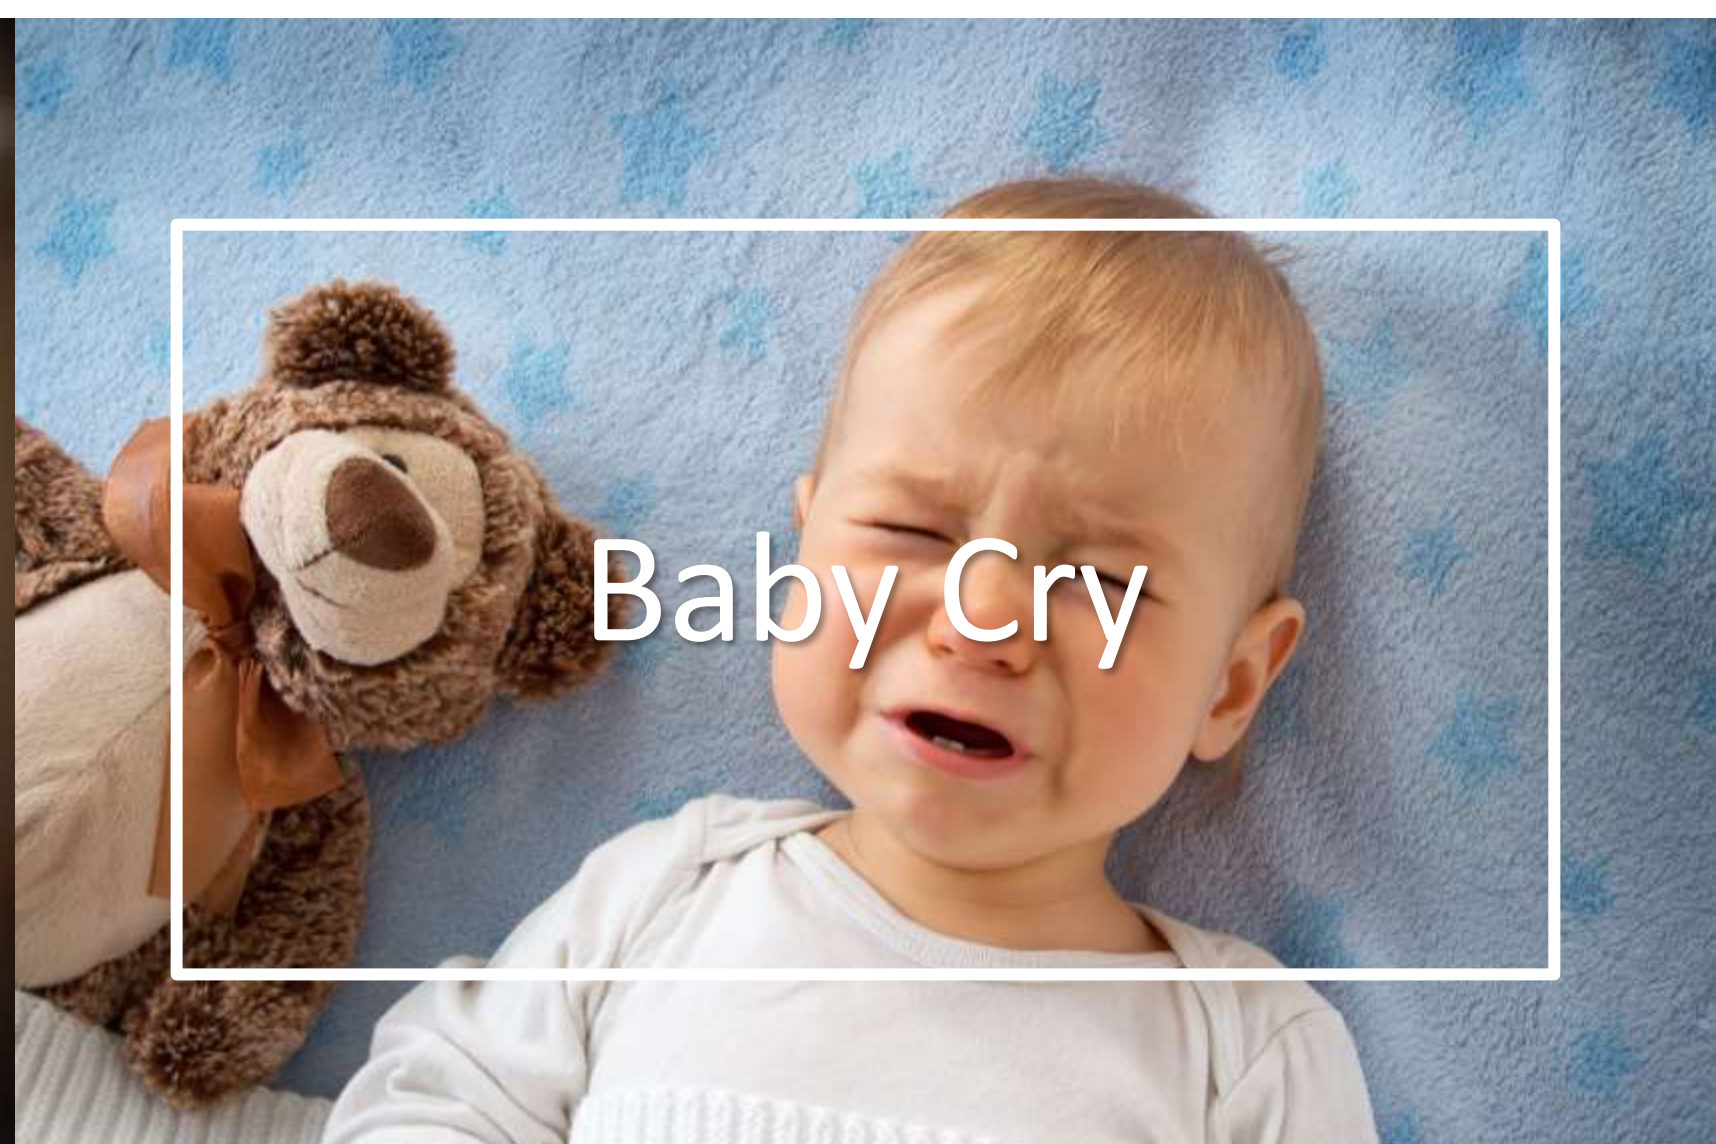

Easy To Integrate

The microphone and internet accessibility are all you need to have, leaving complex computation to our cloud.

Always Smarter

As time goes on, our sound recognition system will evolve in both performance and stability based on our AI technology.

RABBIT EAR TECH

Target Sound Recognition Service

More than you can imagine
